MAHEK GHODMARE

DATA ANALYST • AI BUSINESS ANALYST • FOUNDER

Nagpur, MH • Symbiosis Institute of Technology (SIT Nagpur) • github.com/mahekghodmare • linkedin.com/in/mahekghodmare

PROFESSIONAL SUMMARY

Data Science and AI/ML undergraduate at **Symbiosis Institute of Technology, Nagpur** with practical experience in statistical modeling, exploratory data analysis, and autonomous AI agents. Strong analytical rigor paired with a founder's mindset, having ideated and built consumer brand ventures (CALYVRA & FIZZKEY). Proven track record in predictive analytics, RFM customer clustering, and IEEE signal compression research.

EDUCATION

B.Tech in Data Science & Artificial Intelligence / Machine Learning — 2023 – 2027
Symbiosis Institute of Technology (SIT), Nagpur — *Nagpur, Maharashtra*

TECHNICAL PROFICIENCIES

Programming & Querying:	Python (Pandas, NumPy, Scikit-Learn, Plotly, Seaborn), SQL, SQLite
Analytics & Modeling:	Exploratory Data Analysis (EDA), RFM Segmentation, K-Means Clustering, A/B Testing
AI & Automation:	Autonomous Agentic AI, Multi-step Tool Calling, LLM Prompt Orchestration
BI & Visualization:	Tableau, Power BI, Streamlit Dashboards, Interactive Plotly Reports
Tools & Versioning:	Git, GitHub, Jupyter Notebooks, VS Code, REST APIs, FastAPI

PRACTICAL EXPERIENCE & VENTURES

Data Science & Analytics Intern • Maincrafts Technology — Internship

- Executed end-to-end data cleansing, statistical inference, and predictive machine learning models on real-world datasets.
- Built reporting pipelines and visual analytics charts translating business indicators into actionable executive summaries.

Founder & Product Strategist • CALYVRA & FIZZKEY — 2024 – Present

- **CALYVRA:** Conceptualized card-themed 10ml luxury pocket extrait de parfum with collectible editions and D2C marketing strategy.
- **FIZZKEY:** Engineered a 6-month GTM roadmap for functional sparkling adaptogen beverage with localized contract canning analysis.

KEY PROJECTS & RESEARCH

Vriksha AI Agent — Autonomous Multi-Step Reasoning Engine | *Python, Agentic AI, Tool Execution*

- Built an autonomous AI agent with scratchpad reasoning, tool integration, and self-directed task replanning protocols.
- GitHub: github.com/mahekghodmare/Vriksha-Ai-agent-project-

Shopper Spectrum — Customer RFM Segmentation | *Python, Scikit-Learn, K-Means, Plotly*

- Analyzed 4,300+ customer profiles across Recency, Frequency, Monetary metrics; isolated 4 distinct commercial personas with 94.8% clustering cohesion.

Titanic Multivariate Exploratory Data Analysis Dashboard | *Python, Seaborn, Pandas, Plotly*

- Uncovered demographic survival determinants, class hierarchies, and family cohort survival factors via interactive visualization pipelines.
- GitHub: github.com/mahekghodmare/Data-Science-Analysis-with-Python-

TaskFlow — Agile Workflow & Sprint Velocity Engine | *JavaScript, State Management, UX*

- Created a responsive agile sprint prioritization board with drag-and-drop state persistence and sub-second velocity tracking.
- GitHub: github.com/mahekghodmare/TaskFlow

NEXUS-AIC — ECG Signal Compression Framework | *Healthcare AI, Signal Processing (IEEE Paper in progress)*

- Designed a Unified Priority Score protecting critical QRS cardiac fiducial markers during high-ratio telemetric transmission.

CERTIFICATIONS & HONORS

- **Data Science & Analytics Internship Certification** – Maincrafts Technology
- **Mastering Agentic AI: Prompts to Protocols** – Autonomous Agent Systems Credential
- **Verified Technical Badges (Credly)** – Computational Thinking & Problem Solving
- **Technical Symposium Achievement Recognition** – Symbiosis Institute of Technology
